

CLEAN IT UP! BUILDING ON A TOXIC SITE IS DANGEROUS!

- 1. A new soccer stadium is being built on a site over sewage lines from industrial plants. The soil is contaminated with toxic sewage and chemical waste!**
- 2. Disturbing the soil on toxic sites can release those same harmful chemicals into the air and water.**
- 3. Soil remediation can get rid of toxic chemicals in the soil, but it must be done very carefully and thoroughly!**

WHAT CAN WE DO?

JOIN US THURSDAY TO LEARN AND SATURDAY TO ACT!

THURSDAY MARCH 26 @ 6-7 PM @ YWCA CHESTER 2 E 7th St., Chester, PA

LEARN MORE ABOUT THE STADIUM SITE AND

FIND OUT HOW TO PREVENT THE RELEASE OF TOXIC CHEMICALS!
